

Lavasoft Personal Firewall 2.0

With uncertainty for Internet safety at an all-time high, a top priority for computer users is protecting vulnerable electronic data. A user's personal arsenal against the latest threats must include a solid, dependable firewall. Lavasoft Personal Firewall 2.0 delivers top-notch, proactive protection with advanced, multi-layered security.

Overview

Lavasoft's Personal Firewall software has been redesigned to reflect today's IT security threats. Version 2.0 provides the ultimate security shield from the bad guys. Hackers, keyloggers, Trojans, and spyware are blocked outright from the data on your PC. First-rate firewalls are often complicated to install and run, but LPF 2.0 is easy to use without sacrificing security or control. Developed with our trusted technology partners, it is specially designed for the home environment and small- to medium-sized businesses.

Trust a personal firewall from the makers of the original anti-spyware, Ad-Aware.

Rest easy knowing your privacy is protected from the latest known and emerging threats. New anti-leak technology ensures hackers and thieves are locked out and your personal data is locked in.

You are in control, able to monitor connection status, decide inbound and outbound connections and maintain accurate records for tracking purposes.

Know that your system is safe from malware. Any attempted changes by malicious applications will be blocked, preventing external sources from deactivating your firewall.

Enjoy uninterrupted online entertainment. Whether it be playing games or watching films, Entertainment Mode will suppress firewall prompts.

Unlike many firewalls on the market, Lavasoft Personal Firewall 2.0 is easy to deploy and settings can be tweaked according to your own capabilities and needs.

Key Features

- ➔ Anti-leak functionality
- ➔ Self-protection technology
- ➔ Entertainment Mode
- ➔ Adaptive firewall rules
- ➔ Two-way blocking power
- ➔ Port stealth capabilities
- ➔ Two-way connection management

Ad-Aware anti-spyware is the perfect complement to the Lavasoft Personal Firewall. Download or purchase the original anti-spyware product that provides advanced protection against today's ever-changing malware landscape.

About Lavasoft AB

- Private Company
- Established in 1999
- Headquarters in Gothenburg, Sweden
- 4,000 partners in over 120 countries
- 250 million Ad-Aware downloads worldwide

The Lavasoft Mission

Our mission is to develop and deliver the highest quality anti-spyware solutions and service to keep computers and networks around the globe secure from compromising and intrusive privacy threats.

The Lavasoft Vision

Our vision is that all computer users, regardless of economic status or geographic location, have the power to control their individual privacy and security. We strive to promote an environment of ethical change in the malware industry and uphold our ideals of social and corporate consciousness.

"Lavasoft Personal Firewall is an effective, low maintenance, intelligent firewall... The simple user interface can be deceiving because below this simplified look is an intelligent program that takes the protection of your computer against unauthorized access very serious. Lavasoft Personal Firewall caters for both the novice and power user."
