

Lavasoft Personal Firewall

Computer users today need more than just an anti-spyware program to keep their PC safe and secure. Lavasoft's Personal Firewall offers a superior security shield from hackers, worms and Trojans. Trust high-quality stand alone firewall protection that comes from the anti-spyware company trusted by 200 million people worldwide.

Overview

Personal Firewall software, developed with our trusted technology partners, is designed for home and small- to medium-sized businesses as a complement to your computer security solution. The technology in Personal Firewall shields you from unauthorized traffic entering your computer via the Internet as well as deciding what information is allowed to leave your computer via the Internet.

Choose a personal firewall from the makers of the *original* anti-spyware, trusted by 200 million computer users worldwide.

Rest easy knowing hackers, worms and Trojans are blocked from entering your computer. Your private information like credit card numbers and passwords will stay private, with no risk of being re-routed away from your PC.

You are in control, ultimately deciding all inbound and outbound connections, which is valuable if several family members or work colleagues have access to your computer.

Access to specific Internet sites can be restricted, particularly valuable for computers with multiple users at home, school, or the office.

Surf the web safely. Our powerful Stealth Mode makes your Internet activity invisible to external prying eyes.

Unlike many firewalls on the market, Lavasoft Personal Firewall is easy to deploy and settings can be tweaked according to your capabilities.

Key Features

- ➔ Two-way blocking power
- ➔ Stealth mode technology
- ➔ Two-way connection management
- ➔ Record and track capability
- ➔ Powerful, easy-to-use controls

System Requirements

- ➔ Pentium II, Athlon or higher x-86 compatible processor
- ➔ Minimum RAM: 32MB (Windows 98/SE)
- ➔ 30 MB of available hard disk space
